

XM Radio has given me the opportunity to listen to music and what I want to hear. I pay a service that gives me commercial free and the sound quality that I want. Am/Fm is so far behind its days that you can hear the difference in sound from xm to regular radio. With CD's being so expensive and so many unknown groups out there, XM save me money and I get to hear some great unknown bands. So when these bands come into my area I am able to show my support to them and get others into their music. The Traffic and weather is great because it does keep up to the minute of what's going on unlike regular radio.
